

Best Management Practices for Palletizing

- Put monitors of similar size together for stable stacking
- Place intact monitors in layers, with 9 or 12 units per layer
- To prevent breakage do not stack the monitor face down on pallets
- Starting from the bottom up tightly shrink wrap the monitors onto the pallet

e-Rack

- Maximum 20-22 units depending on the size
- Maximum of approximately 800-900 lbs.
- 27" + Televisions/Monitors or Large Electronic Waste Items should be palletized
- Each e-Recycling Rack is labeled with Asset Numbers and Tare Weights
- If for some reason an e-Recycling Rack is overfilled, makes sure to Shrink Wrap the front sliding door prior to pick up

Organizing the Material

ITEM DESCRIPTION	CONTAINER TYPE	INSTRUCTIONS
27" <LCD/LED Monitors 27" < LCD/LED/PLASMA TV's 27" >LCD/LED Monitors 27" >LCD/LED/PLASMA TV's	e-Rack and/or Pallet e-Rack and/or Pallet Palletize Palletize	Wrap the screens when possible to protect the screens from damage.
27" <CRT Monitors 27" >CRT Monitors	e-Rack and/or Pallet Palletize	Similar sizes stack face-in. Rotate top-to-bottom. You can break plastic stabilizer to maximize efficiencies.
27" <CRT TV's 27" >CRT TV's	e-Rack and/or Pallet Palletize	Similar sizes stack face-in. Similar sizes stack face-in.
Large Console & Oversized Monitors	Palletize	Face-in.
CPU's	e-Rack and/or Pallet	Similar sizes stack face-in. Rotate stack.
Microwaves	Palletize	Similar sizes stack face-in. You can break plastic stabilizer to maximize efficiencies.
Misc. e-waste (Small)	Gaylord or e-Racks	Any order. Fill empty spaces.
Misc. e-waste (Med. to Large)	e-Racks	Any order. Fill empty spaces.
